

Part B: Identify Issues:

1. Usability Issues:

- Poor / No mobile support, navbar overflows on 9:16 aspect ratio, all text and form input boxes uncentred shifting more towards right, etc :

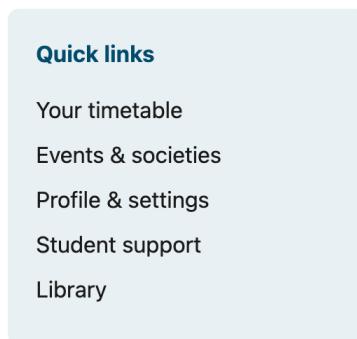

- The cookie policy link on the cookie disclaimer popup does not lead to any link on the site:

We use cookies to improve your experience. By continuing you agree to our [cookie policy](#)

Share location for personalised campus recommendations (optional)

We use cookies to improve your experience. By continuing you agree to our [cookie policy](#). [Accept](#)

- The “Read our privacy notice” link takes you to Profile page which has no privacy notice. The profile page’s end contains a “View full privacy notice” link but leads to nothing when clicked.
- The Help link in navbar doesn’t point to any page.
- The “Quick links” side menu has no clickable buttons, it is only text.

- The profile page’s Edit Contact details form has no clear indication what are the boxes are for, at first it seemed like an email+password field because of the placeholder email, but under further investigation

using the Inspect Element tool, the box underneath the email is actually a phone number field. They need placeholder text for clarity.

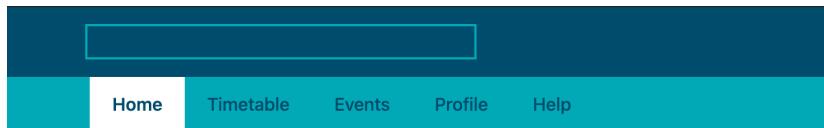

Edit contact details

2. Accessibility issues:

- The cookies request popup has no options / decline option if a user does not consent to having cookies used.
- The keyboard navigation is mostly usable but the website contains a “logo” that has no image / visible text. It is selectable by using TAB key, not clear to users that this will take you back to home screen. Under further investigation, it is a poorly implemented text logo that reads “TU Dublin – Campus Life Companion”

Welcome

- The “Create your account” section of home page, had no placeholders or “for” attributes or “label” elements

Welcome

Get started by entering your details. We collect your name, student ID, email, course, and year to personalise your experience. You can control location sharing and AI recommendations in your profile.

C Implemented Accessibility Improvements.

- I removed the pre-applied value from the email field on the Edit contact details box of “aoife.murphy@mytudublin.ie” email and added placeholders noting to the user that they need to enter in an email address and phone number.
- I have fixed the problem of the logo on the header navbar being invisible due to poor CSS styling, I replaced the styling of “.logo a” from “color: inherit” into “color: white” thus giving this result.

- I added “for” labels before each box, placeholders, replaced unnecessary divs with labels, etc.
